

MODULE 7 WORKSHEET

Consistent Acquisition

Turn one live outreach session into a repeatable operating rhythm without sacrificing targeting quality.

Default execution target: 5 targeted applications + 12 direct-client first touches + every due follow-up + 20 minutes of communication practice.

1. The five acquisition blocks

Block	Purpose	Done?
A. Replenish	Add enough qualified opportunities so tomorrow's pipeline is not empty.	
B. New acquisition	Send new applications and direct outreach.	
C. Follow-ups	Complete every follow-up due before adding unnecessary volume.	
D. Communication drill	Practice or review real calls/replies.	
E. Metrics	Record activity, responses, and one learning.	

2. Replenishment target

Qualified opportunities added:

A / strong-B opportunities added:

Tomorrow's ready-to-contact count:

3. New acquisition log

Targeted applications - 5

#	Company / role	Fit reason	Proof used	Sent
1				
2				
3				
4				
5				

Direct-client first touches - 12

#	Company	Buyer	Reason	Sent
1				
2				
3				
4				
5				
6				
7				
8				
9				
10				
11				
12				

4. Follow-up control

A pipeline is not managed by memory. Complete every due follow-up or deliberately reschedule it with a reason.

Prospect	Last touch	Follow-up purpose	Action taken	Next action

Follow-up quality audit

- [] Each follow-up adds context or reduces friction.
- [] I did not send repeated "just checking in" messages.
- [] I stopped when asked to stop.
- [] Every reply now has a next action or terminal status.

5. Communication practice - 20 minutes

Drill	Target	Actual	Note
Openers	5		
Random objections	10		
Appointment asks	3		
Real reply/call review	1 if available		

Single communication weakness:

One correction for next session:

6. Acquisition scorecard

Metric	Count
New qualified opportunities	
Applications	
Direct first touches	
Follow-ups due	
Follow-ups completed	
Replies/conversations	
Positive interest	
Interviews/calls	

One lesson from real market behavior:

MODULE 7 QUALITY GATE

Consistent Acquisition - PASS / REVISE

Pass standard: You can execute the acquisition loop without skipping follow-ups, lowering prospect quality, or losing track of next actions.

- ☐ 5 targeted applications completed.
- ☐ 12 direct first touches completed.
- ☐ 100% of due follow-ups handled or deliberately rescheduled.
- ☐ New pipeline opportunities replenished.
- ☐ Communication practice completed.
- ☐ Tracker is current.
- ☐ One learning was captured.

Result	PASS / REVISE
Primary weakness	
Correction
