

# MODULE 4 WORKSHEET

## Proof Package

Build a compact body of evidence a prospective client can inspect before deciding whether to trust you.

**Module objective:** Finish with a five-part proof stack - service brief, 10-lead sample, mini outreach sequence, sample campaign teardown, and 60-90 second voice/call sample.

**No-fake-proof rule:** Never imply that sample work came from a paying client if it did not. Label hypothetical work clearly as **Sample Campaign, Demonstration, or Practice Portfolio**.

### 1. Proof package identity

Professional positioning / headline:

---

Target client niche:

---

Primary buyer:

---

Core service:

---

One-sentence offer:

---

---

### 2. The five proofs

| Proof                     | What it proves                                                   | Status                      |
|---------------------------|------------------------------------------------------------------|-----------------------------|
| 1. Service brief          | You understand what you do, for whom, and what is included.      | Not started / Draft / Ready |
| 2. 10-lead sample         | You can identify relevant companies and decision-makers.         | Not started / Draft / Ready |
| 3. Mini outreach sequence | You can communicate relevance without generic spam.              | Not started / Draft / Ready |
| 4. Campaign teardown      | You can think through ICP, triggers, qualification, and metrics. | Not started / Draft / Ready |
| 5. Voice/call sample      | You can speak clearly and handle a first-contact interaction.    | Not started / Draft / Ready |

### 3. One-page service brief builder

Your service brief is not a full website. It should let a busy client understand your scope in one page.

#### Headline

Use a specific role or outcome, not vague claims such as "I help businesses grow."

---

#### Who I help

---

#### What I handle

Check only what you can honestly deliver now.

- |                                                 |                                                      |
|-------------------------------------------------|------------------------------------------------------|
| <input type="checkbox"/> Lead research          | <input type="checkbox"/> Decision-maker research     |
| <input type="checkbox"/> Contact verification   | <input type="checkbox"/> Cold email                  |
| <input type="checkbox"/> LinkedIn / DM outreach | <input type="checkbox"/> Cold calling                |
| <input type="checkbox"/> Follow-up              | <input type="checkbox"/> Qualification               |
| <input type="checkbox"/> Appointment setting    | <input type="checkbox"/> CRM updates / handoff notes |

#### My exact current scope:

---

#### How I work

Describe your process in 3-5 steps.

---

#### What a client receives

---

#### CTA

---

#### Service brief audit

- |                                                    |                                                             |
|----------------------------------------------------|-------------------------------------------------------------|
| <input type="checkbox"/> Fits on one page.         | <input type="checkbox"/> No unsupported performance claims. |
| <input type="checkbox"/> Scope is specific.        | <input type="checkbox"/> Client can see the deliverables.   |
| <input type="checkbox"/> No unnecessary biography. | <input type="checkbox"/> CTA is clear.                      |

## 4. Ten-lead sample presentation

Use the verified leads from Module 2. The objective here is presentation and evidence - not researching a second random list.

| #  | Company | Contact / role | Why it fits | Trigger / relevance | Source proof |
|----|---------|----------------|-------------|---------------------|--------------|
| 1  |         |                |             |                     |              |
| 2  |         |                |             |                     |              |
| 3  |         |                |             |                     |              |
| 4  |         |                |             |                     |              |
| 5  |         |                |             |                     |              |
| 6  |         |                |             |                     |              |
| 7  |         |                |             |                     |              |
| 8  |         |                |             |                     |              |
| 9  |         |                |             |                     |              |
| 10 |         |                |             |                     |              |

### Lead-sample introduction

Write 2-3 sentences explaining what the list demonstrates. Clearly label it as a sample if it was not made for a paying client.

---

---

---

### Presentation audit

- ☐ At least 9 of 10 leads still pass the four-proof standard.
- ☐ Every source can be checked.
- ☐ No unnecessary personal data is included.
- ☐ Formatting is clean enough to show a client.
- ☐ The file says "Sample" or equivalent where appropriate.

## 5. Mini outreach sequence proof

Use your strongest Module 3 messages. This section shows that you can move from research to communication.

### Target account context

Company / account type:

---

Primary persona:

---

Reason for contact:

---

### First-touch email

---

---

---

---

### Follow-up 1

---

---

---

### Follow-up 2

---

---

---

### LinkedIn / DM alternative

---

---

---

### Why this sequence is credible

Explain what is account-specific, what is truthful, and why the CTA is appropriate.

---

---

☐ No fake proof.

☐ No fake urgency.

☐ Each follow-up adds something.

☐ CTA is easy to answer.

☐ Reason for contact is visible.

☐ Claims are verifiable.

## 6. Sample campaign teardown

Choose one real company you would genuinely consider serving. You are analyzing it - not claiming it as a client.

Company:

---

What they sell:

---

Likely buyer / sales owner:

---

### Probable ICP

---

---

### Three example target accounts

| # | Account | Why it fits | Likely decision-maker |
|---|---------|-------------|-----------------------|
| 1 |         |             |                       |
| 2 |         |             |                       |
| 3 |         |             |                       |

### Three useful trigger signals

1.

---

2.

---

3.

---

### Qualification definition

---

---

### Metrics I would track

---

---

### One likely campaign risk

---

## 7. Voice / cold-call sample

The audio sample should demonstrate clarity, composure, relevance, and recovery - not a perfect accent or theatrical performance.

### Recording structure - 60 to 90 seconds

| Segment             | What to include                                       | Your notes |
|---------------------|-------------------------------------------------------|------------|
| 1. Introduction     | Name + professional positioning.                      |            |
| 2. Cold-call opener | Identity -> reason -> relevance -> question.          |            |
| 3. Objection        | Respond to "not interested" or "send me information." |            |
| 4. Next-step ask    | Ask for a reasonable next step.                       |            |

### Practice notes

Opening:

---

Objection I will demonstrate:

---

My response:

---

---

Final next-step ask:

---

### Recording audit

- |                                                  |                                                           |
|--------------------------------------------------|-----------------------------------------------------------|
| <input type="checkbox"/> 60-90 seconds.          | <input type="checkbox"/> Understandable at normal volume. |
| <input type="checkbox"/> No unsupported claims.  | <input type="checkbox"/> Natural pace.                    |
| <input type="checkbox"/> No long script reading. | <input type="checkbox"/> Recovers after objection.        |
| <input type="checkbox"/> Next step is clear.     | <input type="checkbox"/> File name is professional.       |

One weakness I heard when listening back:

---

One correction before final recording:

---

## 8. Assemble the client-facing package

Do not overwhelm prospects with everything at once. Build the full proof stack, then send the smallest relevant evidence for each opportunity.

### Master proof folder

| File / asset      | Recommended name                         | Ready? |
|-------------------|------------------------------------------|--------|
| Service brief     | YourName-B2B-Sales-Service-Brief.pdf     |        |
| Lead sample       | YourName-Sample-Lead-Research.xlsx / PDF |        |
| Outreach sample   | YourName-Sample-Outreach.pdf             |        |
| Campaign teardown | YourName-Sample-Campaign-Plan.pdf        |        |
| Voice sample      | YourName-Cold-Call-Sample.mp3 / m4a      |        |

### Opportunity-specific proof selector

Choose what you would send in each situation. Do not send five attachments automatically.

| Opportunity                | Best proof to send first | Why |
|----------------------------|--------------------------|-----|
| Lead research job          |                          |     |
| Cold caller role           |                          |     |
| Appointment setter role    |                          |     |
| Direct outreach to founder |                          |     |

### Trust audit

- ☐ Sample work is labeled honestly.
- ☐ I never claim sample results as client results.
- ☐ I can explain how each asset was produced.
- ☐ I removed confidential information from any real-work examples.
- ☐ File names and formatting look professional.
- ☐ I send only relevant proof, not a giant portfolio dump.

# MODULE 4 QUALITY GATE

## Proof Package - PASS / REVISE

Do not advance to Module 5 until a prospective client can judge your thinking, research, writing, speaking, and organization from the package.

**Pass standard: The proof stack is honest, specific, clean, and strong enough that a client does not need to rely only on your self-description.**

- ☐ I completed a one-page service brief.
- ☐ I completed a verified 10-lead sample.
- ☐ At least 9 of 10 sample leads pass the four-proof standard.
- ☐ I completed a mini outreach sequence.
- ☐ I completed a clearly labeled sample campaign teardown.
- ☐ I completed a 60-90 second voice / call sample.
- ☐ None of the assets imply fake clients, fake revenue, or fake meetings.
- ☐ No confidential employer/client information is exposed.
- ☐ The package uses one consistent positioning and target market.
- ☐ Every file is understandable without me standing beside the client to explain it.
- ☐ I know which single proof asset to send for different opportunities.
- ☐ A client can judge my research, writing, speaking, and process from the package.

### Module 4 result

| Instructor / self-review decision    | PASS / REVISE |
|--------------------------------------|---------------|
| Strongest proof asset                |               |
| Weakest proof asset                  |               |
| Required correction before advancing |               |

### Final proof package inventory

|                   |                |
|-------------------|----------------|
| Service brief     | READY / REVISE |
| 10-lead sample    | READY / REVISE |
| Outreach sample   | READY / REVISE |
| Campaign teardown | READY / REVISE |
| Voice/call sample | READY / REVISE |
