

MODULE 9 WORKSHEET

Communication Improvement

Improve the live communication behaviors that determine whether outreach turns into useful conversations.

Completion target: 5 opener repetitions, 10 random objection drills, 3 appointment asks, review of real replies/calls when available, and one corrected communication weakness.

1. Baseline self-score

Skill	1-5	Evidence / example
Clear opening		
Listening without interrupting		
Explaining reason for call		
Handling objections		
Asking follow-up questions		
Asking for next step		
Recovering when off-script		

Single biggest weakness:

2. Opener repetition - 5

Do not rewrite the opener five times. Repeat the same core structure until it sounds natural, then make one correction.

Rep	What sounded good?	Where did I stumble?	Correction
1			
2			
3			
4			
5			

Final opener:

3. Random objection drill - 10

Use different objection categories. Answer naturally using Hear -> Echo/validate -> Learn -> Propose.

#	Objection	My response	Score 1-5
1	Not interested		
2	Send me info		
3	Already have someone		
4	Busy		
5	Wrong person		
6	Who are you?		
7	No budget		
8	Not a priority		
9	Call later		
10	Random / custom		

4. Appointment / next-step ask - 3 reps

Rep	Situation	Exact ask	Was the value of next step clear?
1			Y/N
2			Y/N
3			Y/N

5. Real interaction review

Use a real call, reply thread, or interview if available. If none exists yet, use one recorded roleplay only.

Interaction reviewed:

What the other person actually said:

What I did well:

Where I lost clarity / control:

Better response:

6. Communication behavior checklist

- ☐ I pause after objections instead of immediately talking over them.
- ☐ I answer the person's actual concern before returning to my goal.
- ☐ I ask one useful question at a time.
- ☐ I avoid jargon I cannot explain.
- ☐ I can say "I don't know; I'll confirm" when needed.
- ☐ I do not invent technical or pricing answers.
- ☐ I can return to the call map after going off-script.
- ☐ I end cleanly when there is no fit or the person asks to stop.

Single-focus improvement

For the next live calls, I will focus on:

Observable behavior that will show improvement:

MODULE 9 QUALITY GATE

Communication Improvement - PASS / REVISE

Pass standard: You can open clearly, listen, respond to resistance, recover off-script, and ask for a next step without relying on memorized paragraphs.

- ☐ 5 opener reps completed.
- ☐ 10 objection reps completed.
- ☐ 3 next-step asks completed.
- ☐ At least one real interaction or recording was reviewed.
- ☐ One weakness was selected instead of trying to fix everything.
- ☐ A corrected behavior was practiced.
- ☐ I can recover after interruption without restarting the script.

Result	PASS / REVISE
Primary improvement	
Next live-call focus
